

Your playground

brought to life

The Assumption Primary School

Bathurst, NSW

Moduplay designers worked in collaboration with staff at The Assumption Primary School to create a challenging playground featuring a bespoke Multi-Play Unit.

The design of the playground not only develops children's inquisitive and active minds, but burns excess energy and builds physical strength while outside the classroom.

As professional teaching staff know, children that play actively outside the classroom are happier, stronger and more focused during school lesson times.

Utilising all available space to maximise the play value, our designers worked with the natural sloping area close to the playground to include a 7m Tube Slide.

Let our design team work with you to create an amazing play space for your school.

PLAY is Learning

Children learn through play. 75% of brain development occurs between birth and 3 years of age. Mostly through play.

PLAY is Creativity

Children are mini-entrepreneurs looking for better ways to do things. Play teaches the skills of creativity.

PLAY is Co-ordination

Gross motor skills are largely learnt through play. Climbing, gripping, balancing, sliding and jumping.

PLAY is Resilience

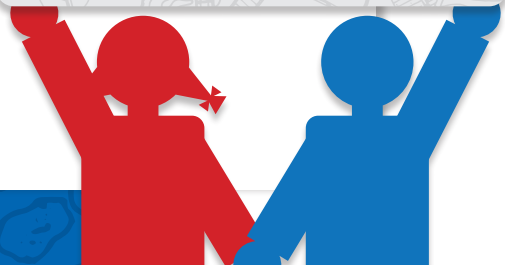

Children that play learn resilience and grow into confident adults that know themselves well.

PLAY is Healthy

Active play keeps children strong and well, setting them up for a healthy life by enjoying exercise.

MODUPLAY TRAMPOLINES

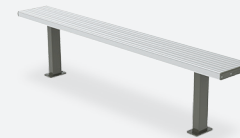

Bring the benefits of trampolining into the school environment.

The jumping action of trampolines increases balancing skills, develops better co-ordination and builds muscle control in children.

Oxford Platform

 precinctstreetandpark.com.au

The children are really enjoying the different play stations and the P+F and general parent body are delighted with the aesthetics and with the wonderful opportunities for gross motor development that the playground has created.

– G.L. – Assistant Principal
Private Primary School, North Coast NSW

The principal rang to say it all looks great, she is happy there are more play items which keep the children playing. So thank you for your patience and organising the equipment. It does look great.

– Ann Fallon
P&C at Bernard's Primary School, Berowra

The equipment is fantastic. The kids swarm over it like ants. Congrats to the fellas for a great job.

– School Principal
Figtree Public School, Illawarra NSW
